

REMARKS

Claims 1 - 12 are original in the application. In the present amendment, Applicants cancel claims 1 - 11 without prejudice. Claim 12 has been amended to more clearly claim the subject matter that Applicants regard as the invention. Applicants respectfully request examination of the application with consideration of claim 12. Applicants believe claim 12 to be patentable and respectfully request allowance of the application.

As in the parent application, Applicants have amended the specification to correct minor errors. The changes made to the specification are the same as made in the parent application. The changes made are primarily typographical or grammatical in nature, or involve minor clarification of an awkward wording. Applicants believe that these changes add no new matter to the application and are fully supported by the original disclosure.

Respectfully submitted,
